

I am very disappointed to learn that NAB is trying to petition for limited broadcast programming on XM satellite radio - petition 04-160.

I have had XM's satellite radio for over two years. The programming that is offered is not available on commercial stations. The traffic and weather is more comprehensive than on a commercial station. This is a service I pay to subscribe to and do not feel the government should be making a decision that impacts the first amendment. Plus, NAB should not dictate what I hear!

I hope the right decision is made to allow XM Satellite Radio to keep producing the programs that their listeners want to hear.

Sincerely,

Scott Heyer
